

Kirjolab

An integrated workspace where scholarly evidence becomes traceable prose.

INSPECT THE TRAIL · KEEP THE SOURCE · DECIDE WHAT CHANGES

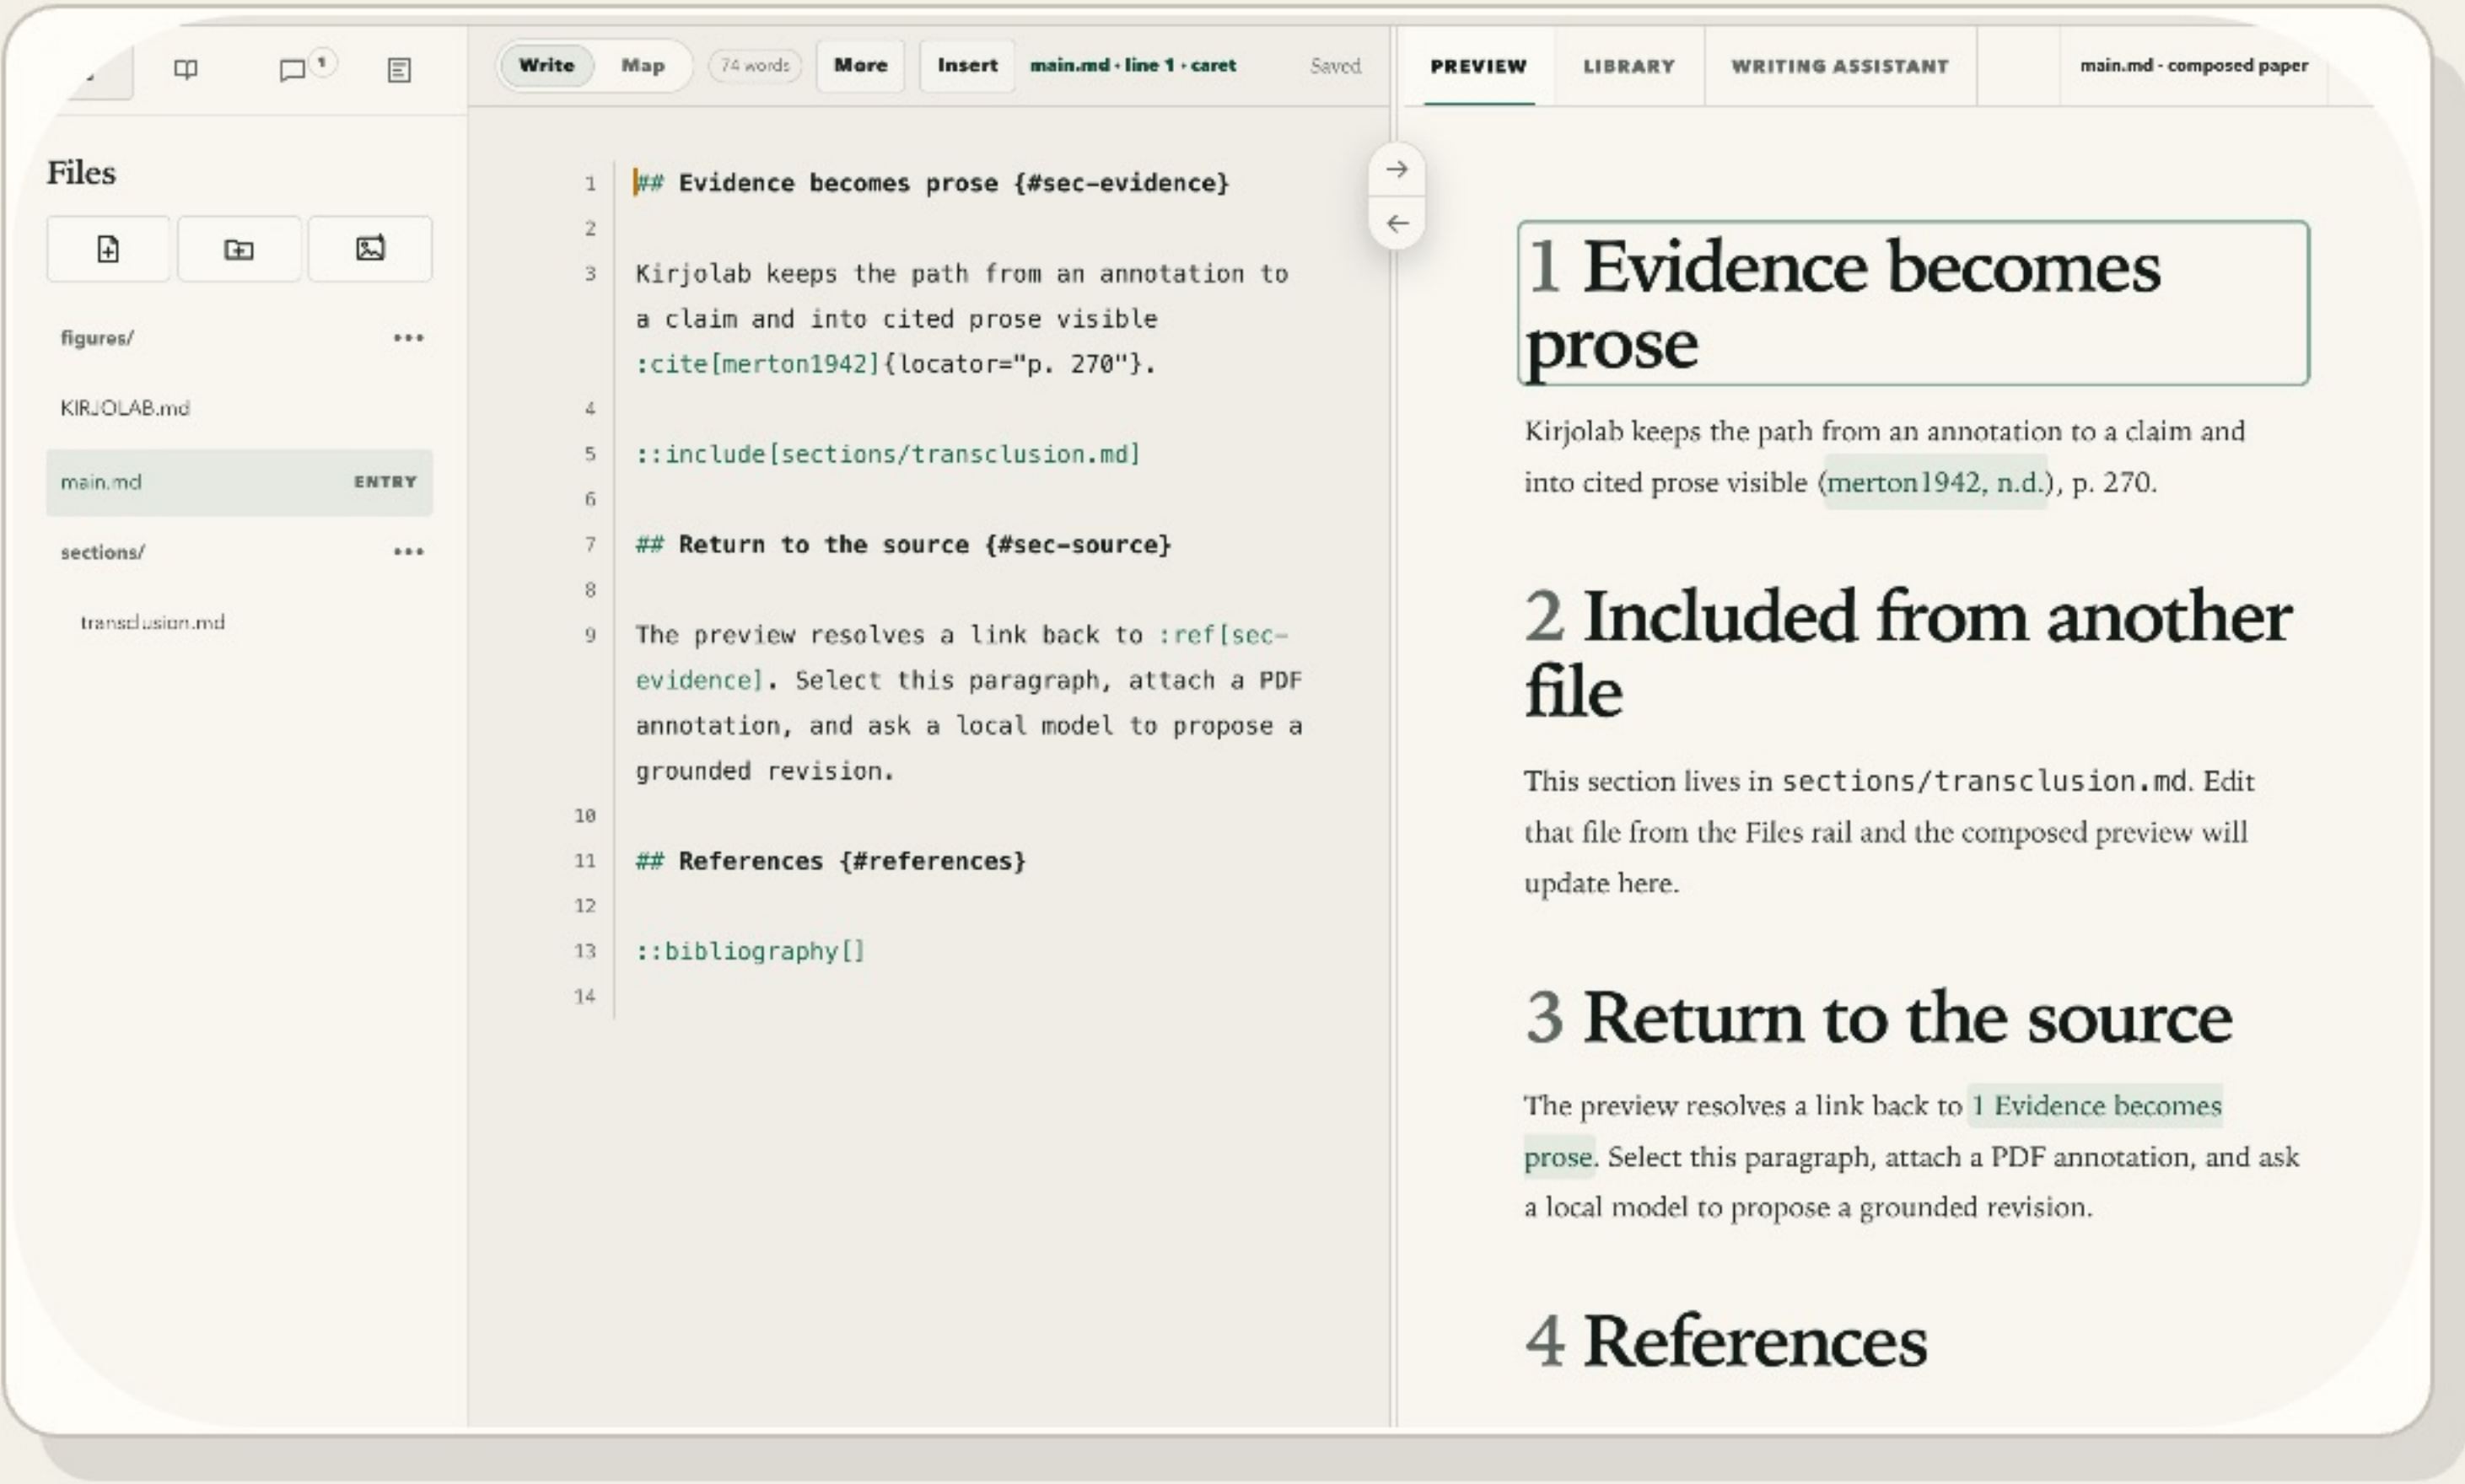

A citation survives. Its evidence trail often does not.

Research work crosses tools. Each handoff makes the source passage, reasoning, model context, and human decision harder to reconstruct.

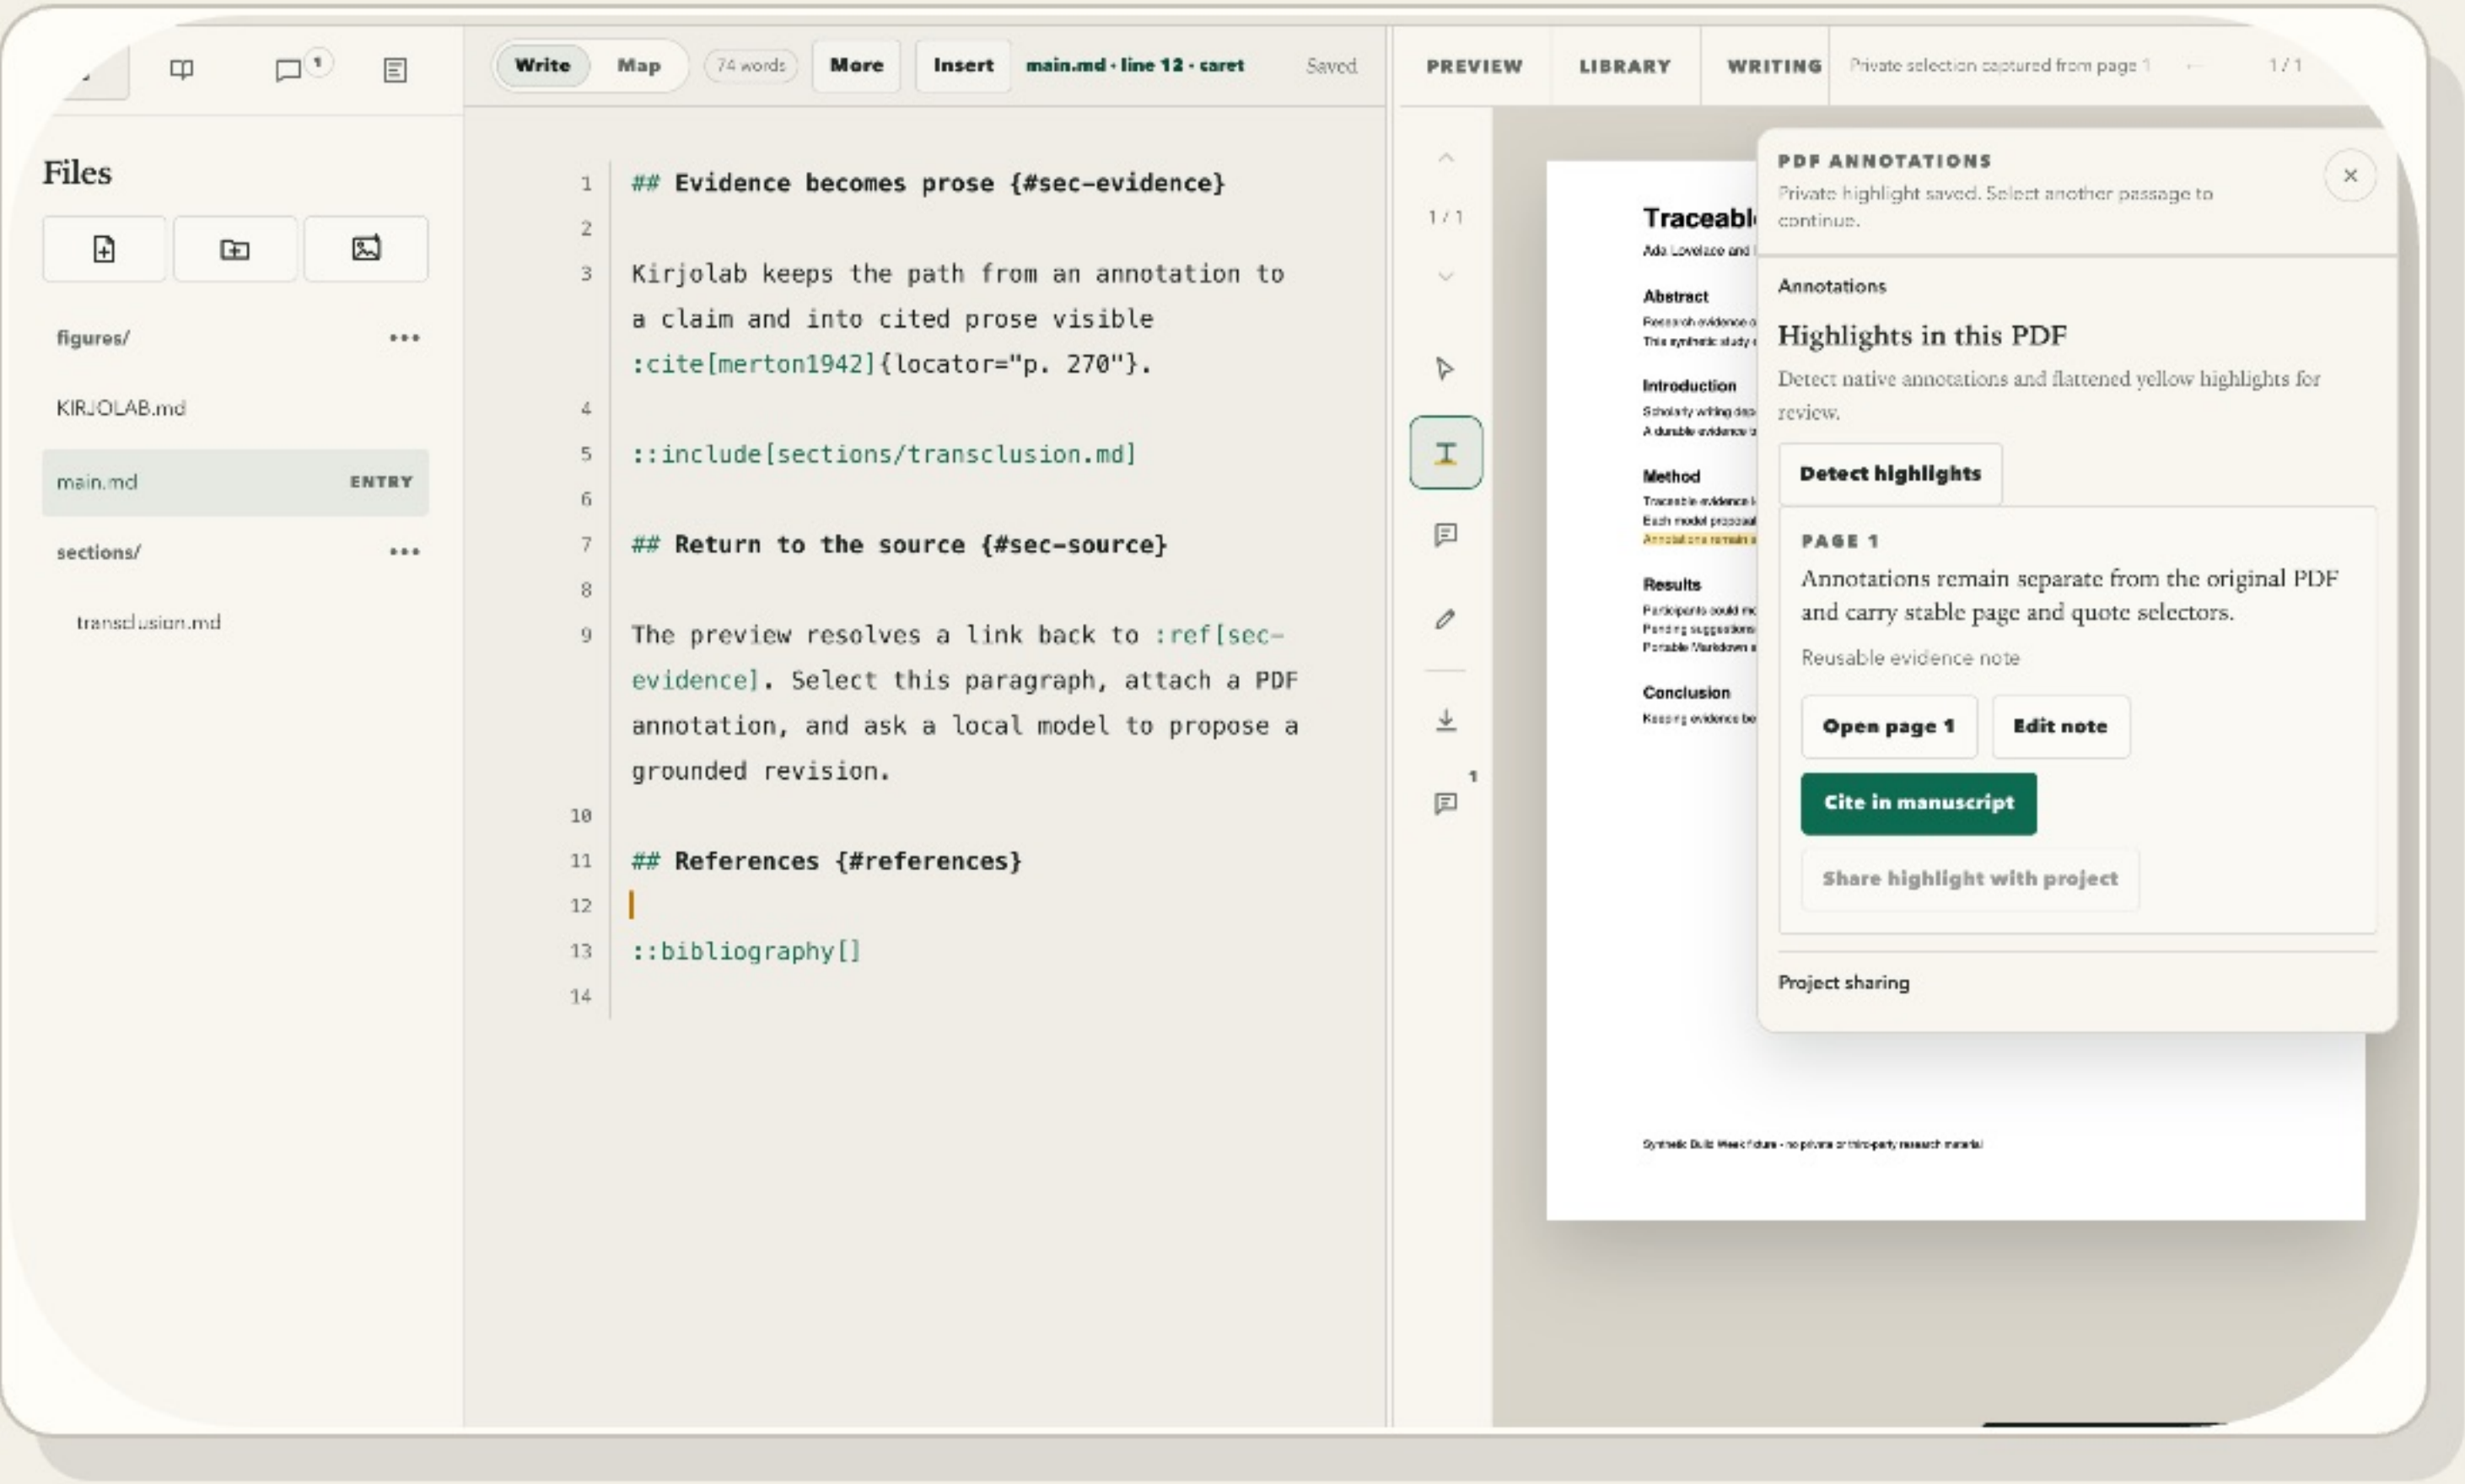

A highlight becomes a citation.

Select a PDF passage, save the evidence, then insert its source and page at the remembered manuscript caret.

WRITE · CANONICAL MARKDOWN + LIVE PREVIEW

EVIDENCE · HIGHLIGHT + PAGE-AWARE CITATION

The evidence trail stays visible.

SECTION

References

1 Evidence becomes
prose

Kirjolab keeps the path from an annotation to a claim and
into cited prose visible (merton1942, n.d.), p. 270.

2 Included from another
file

This section lives in sections/transclusion.md. Edit
that file from the Files rail and the composed preview will
update here.

3 Return to the source

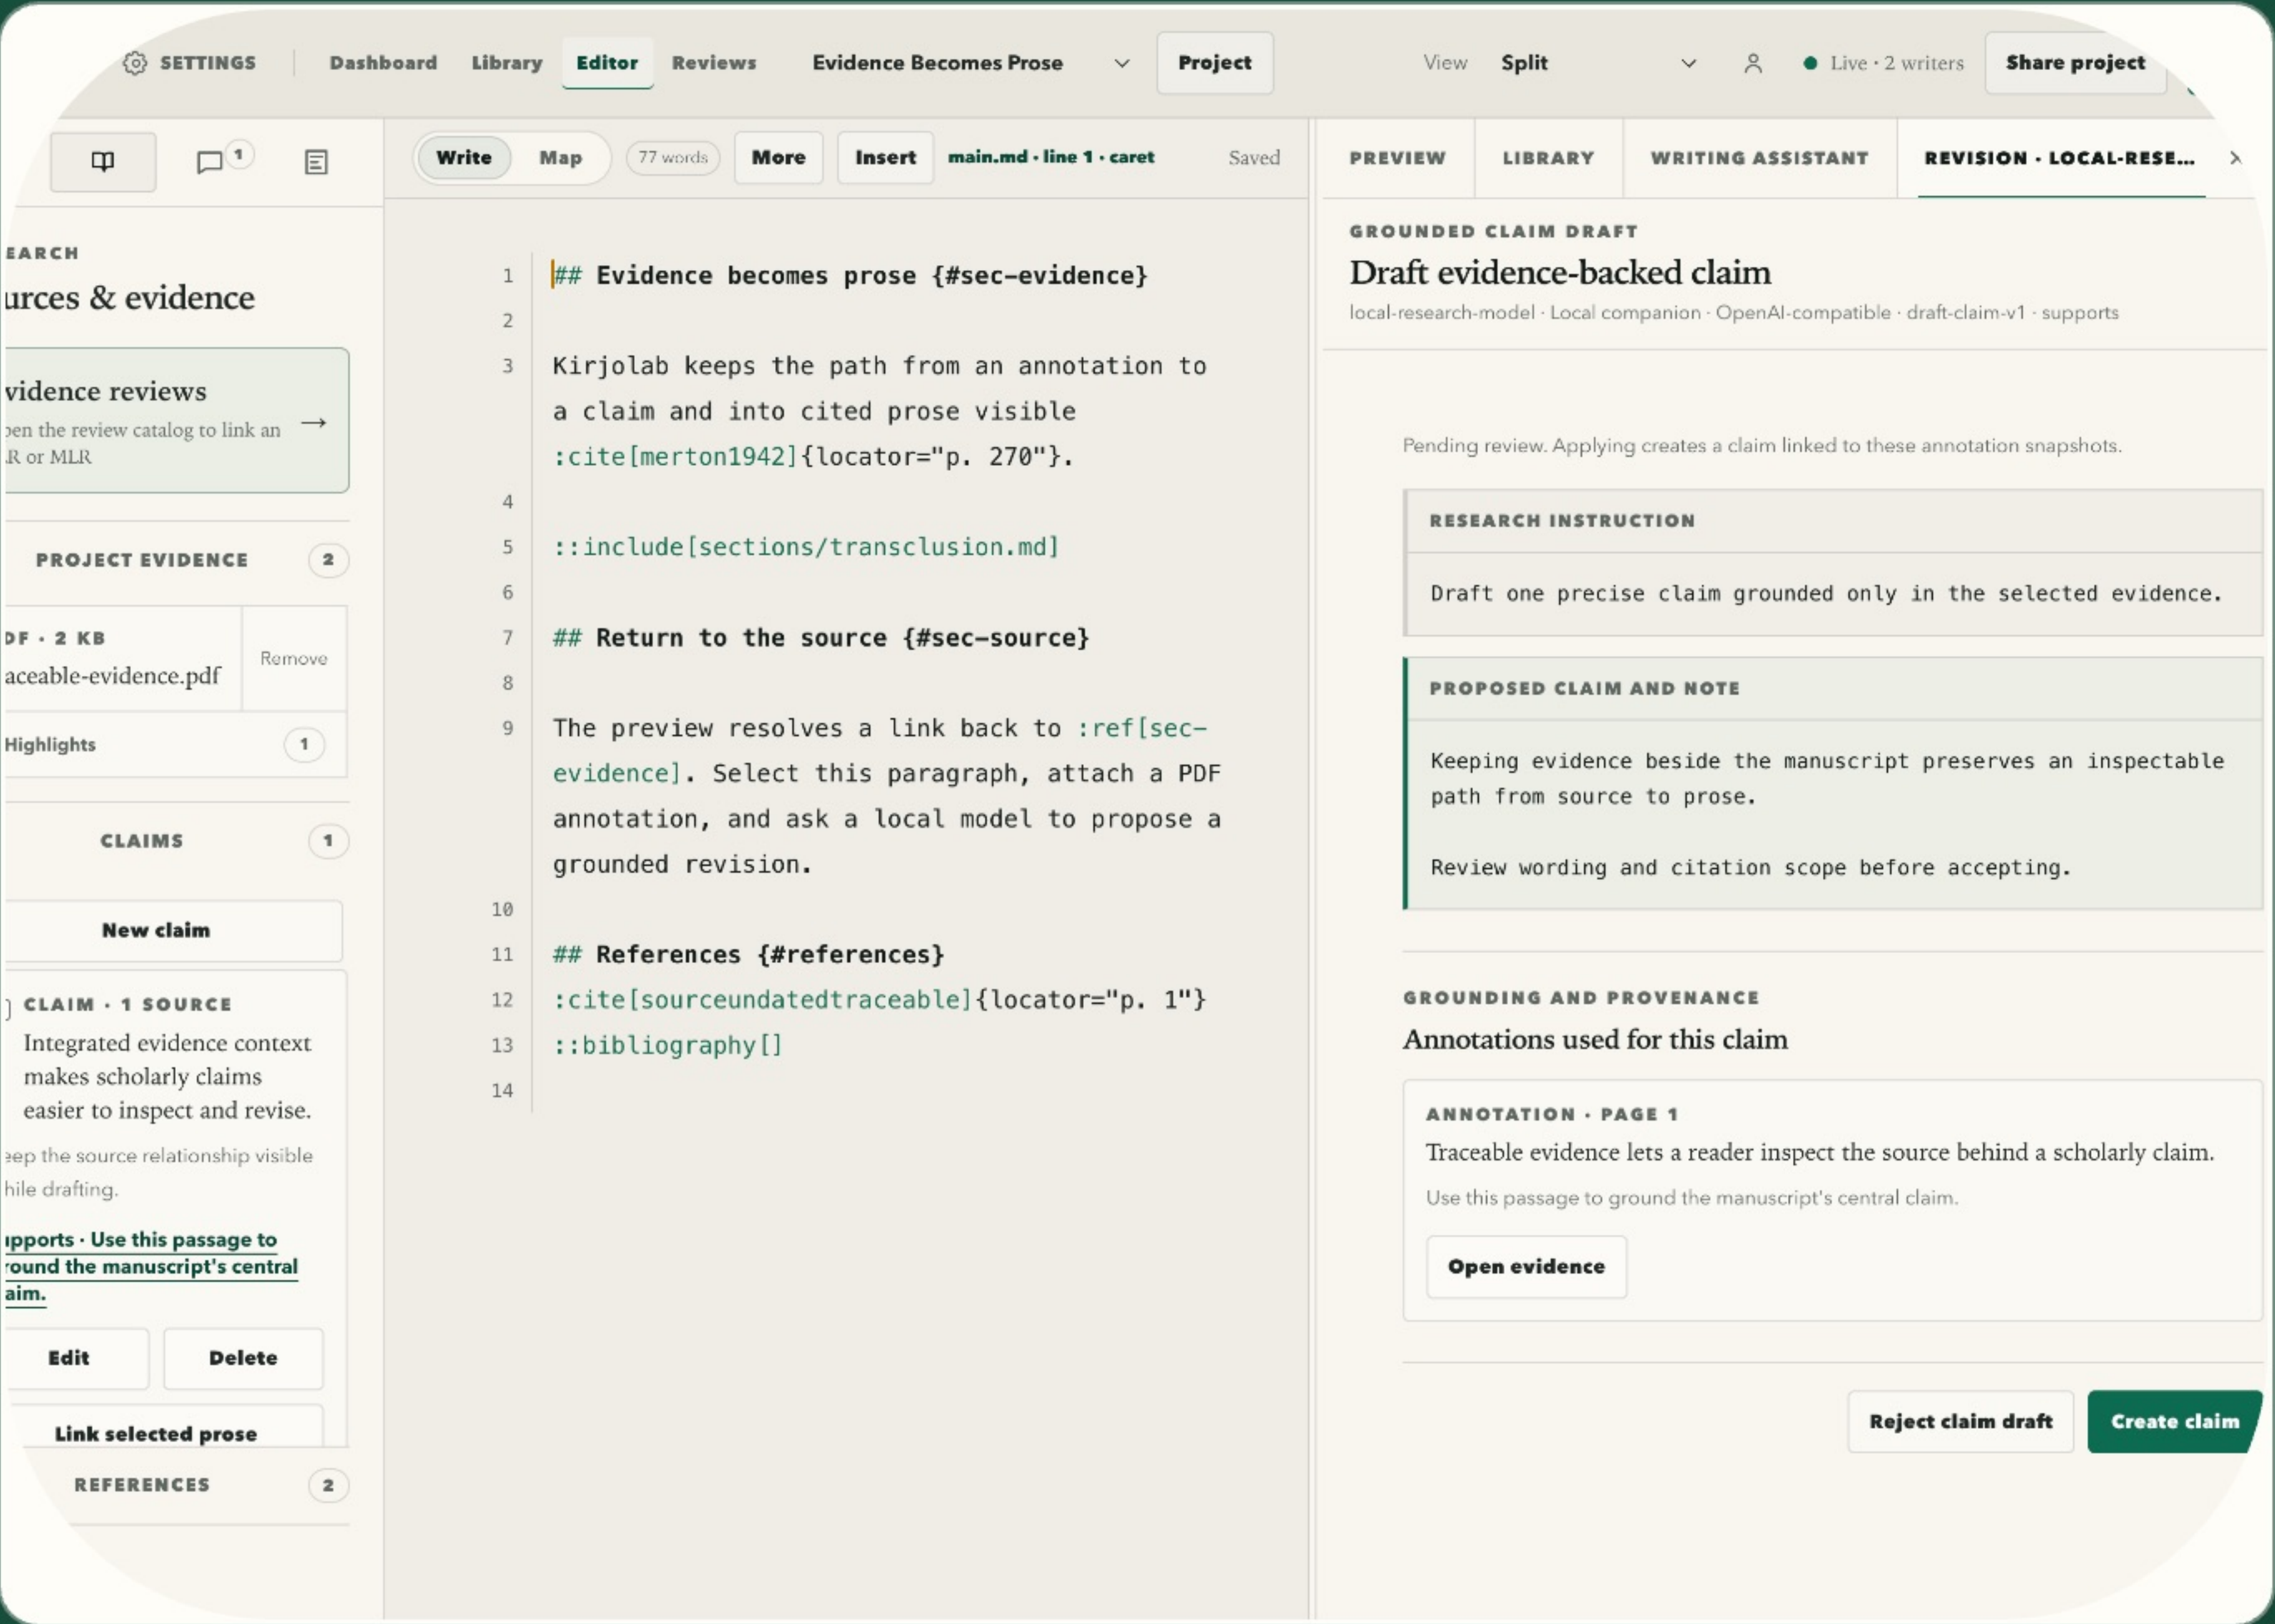

The preview resolves a link back to 1 Evidence becomes
prose. Select this paragraph, attach a PDF annotation, and ask
a local model to propose a grounded revision.

4 References

(sourceundatedtraceable, n.d.), p. 1

1. sourceundatedtraceable (n.d.). traceable evidence

THE MODEL BOUNDARY

AI PROPOSES

The researcher decides.

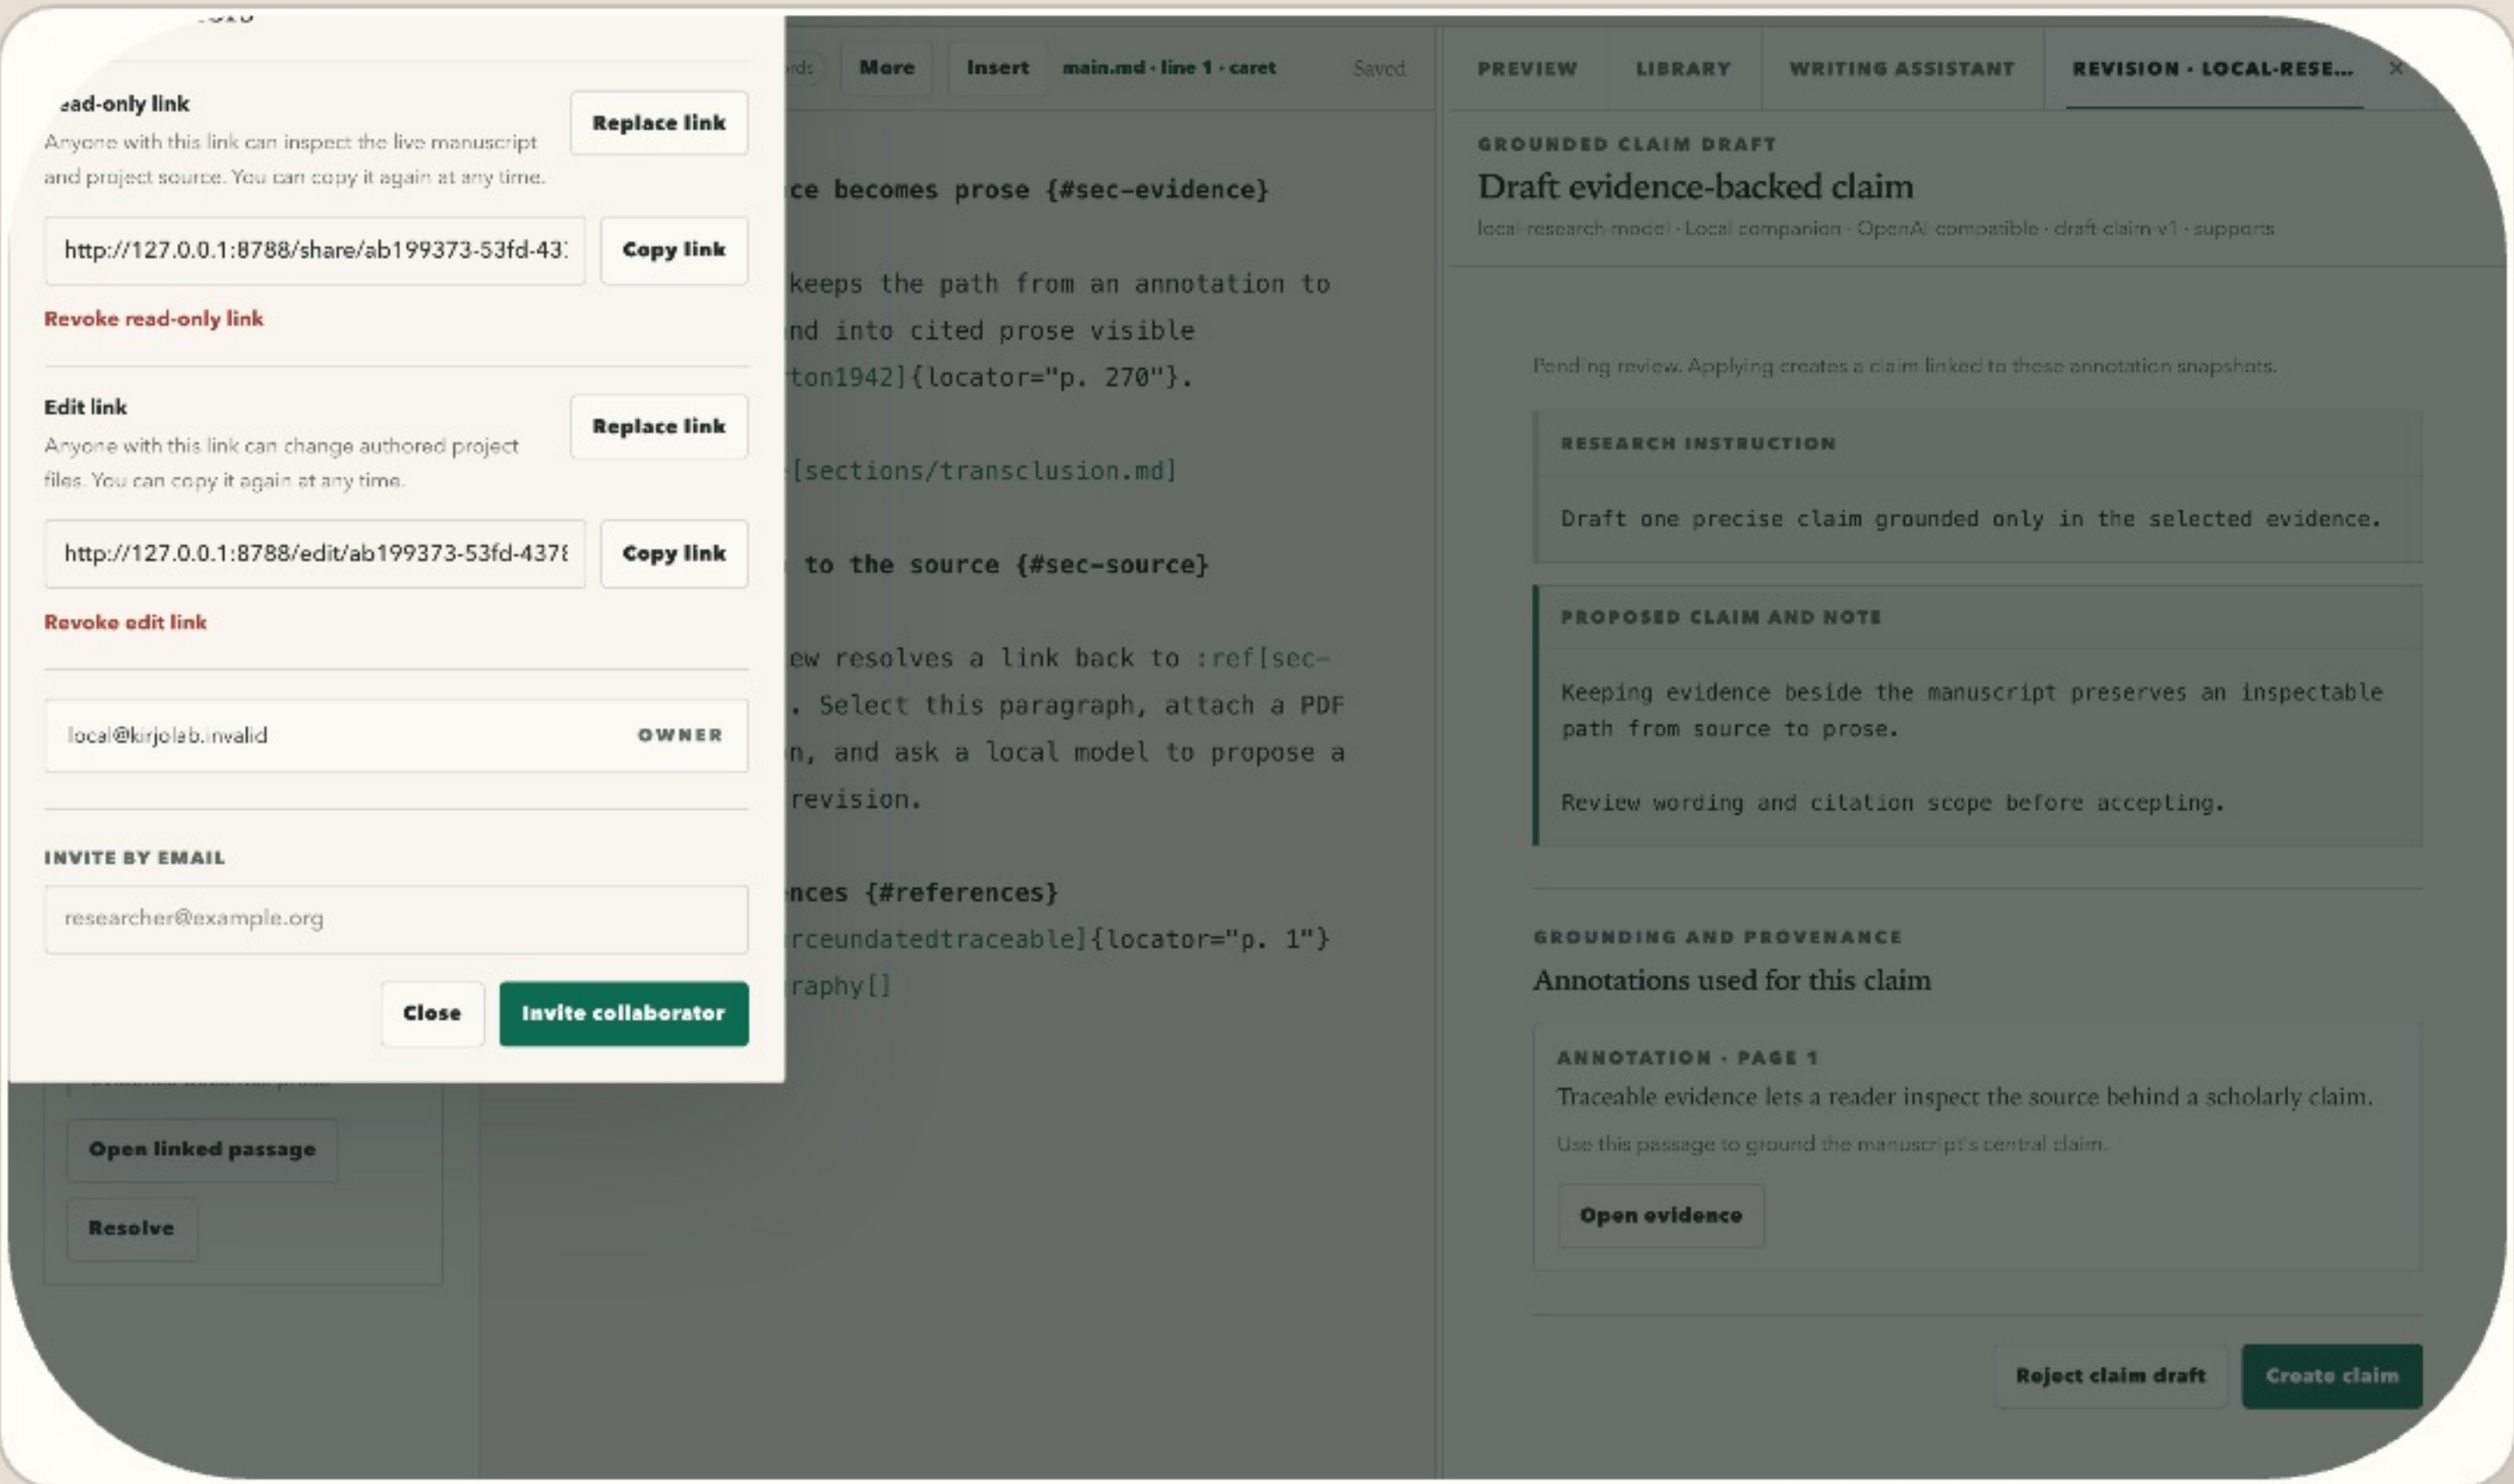

- Explicit target and evidence
- Recorded model identity
- Reviewable candidate state
- Accept, edit, or reject
- No silent manuscript mutation

Local-capable. Provider-neutral.
Human-disposed.

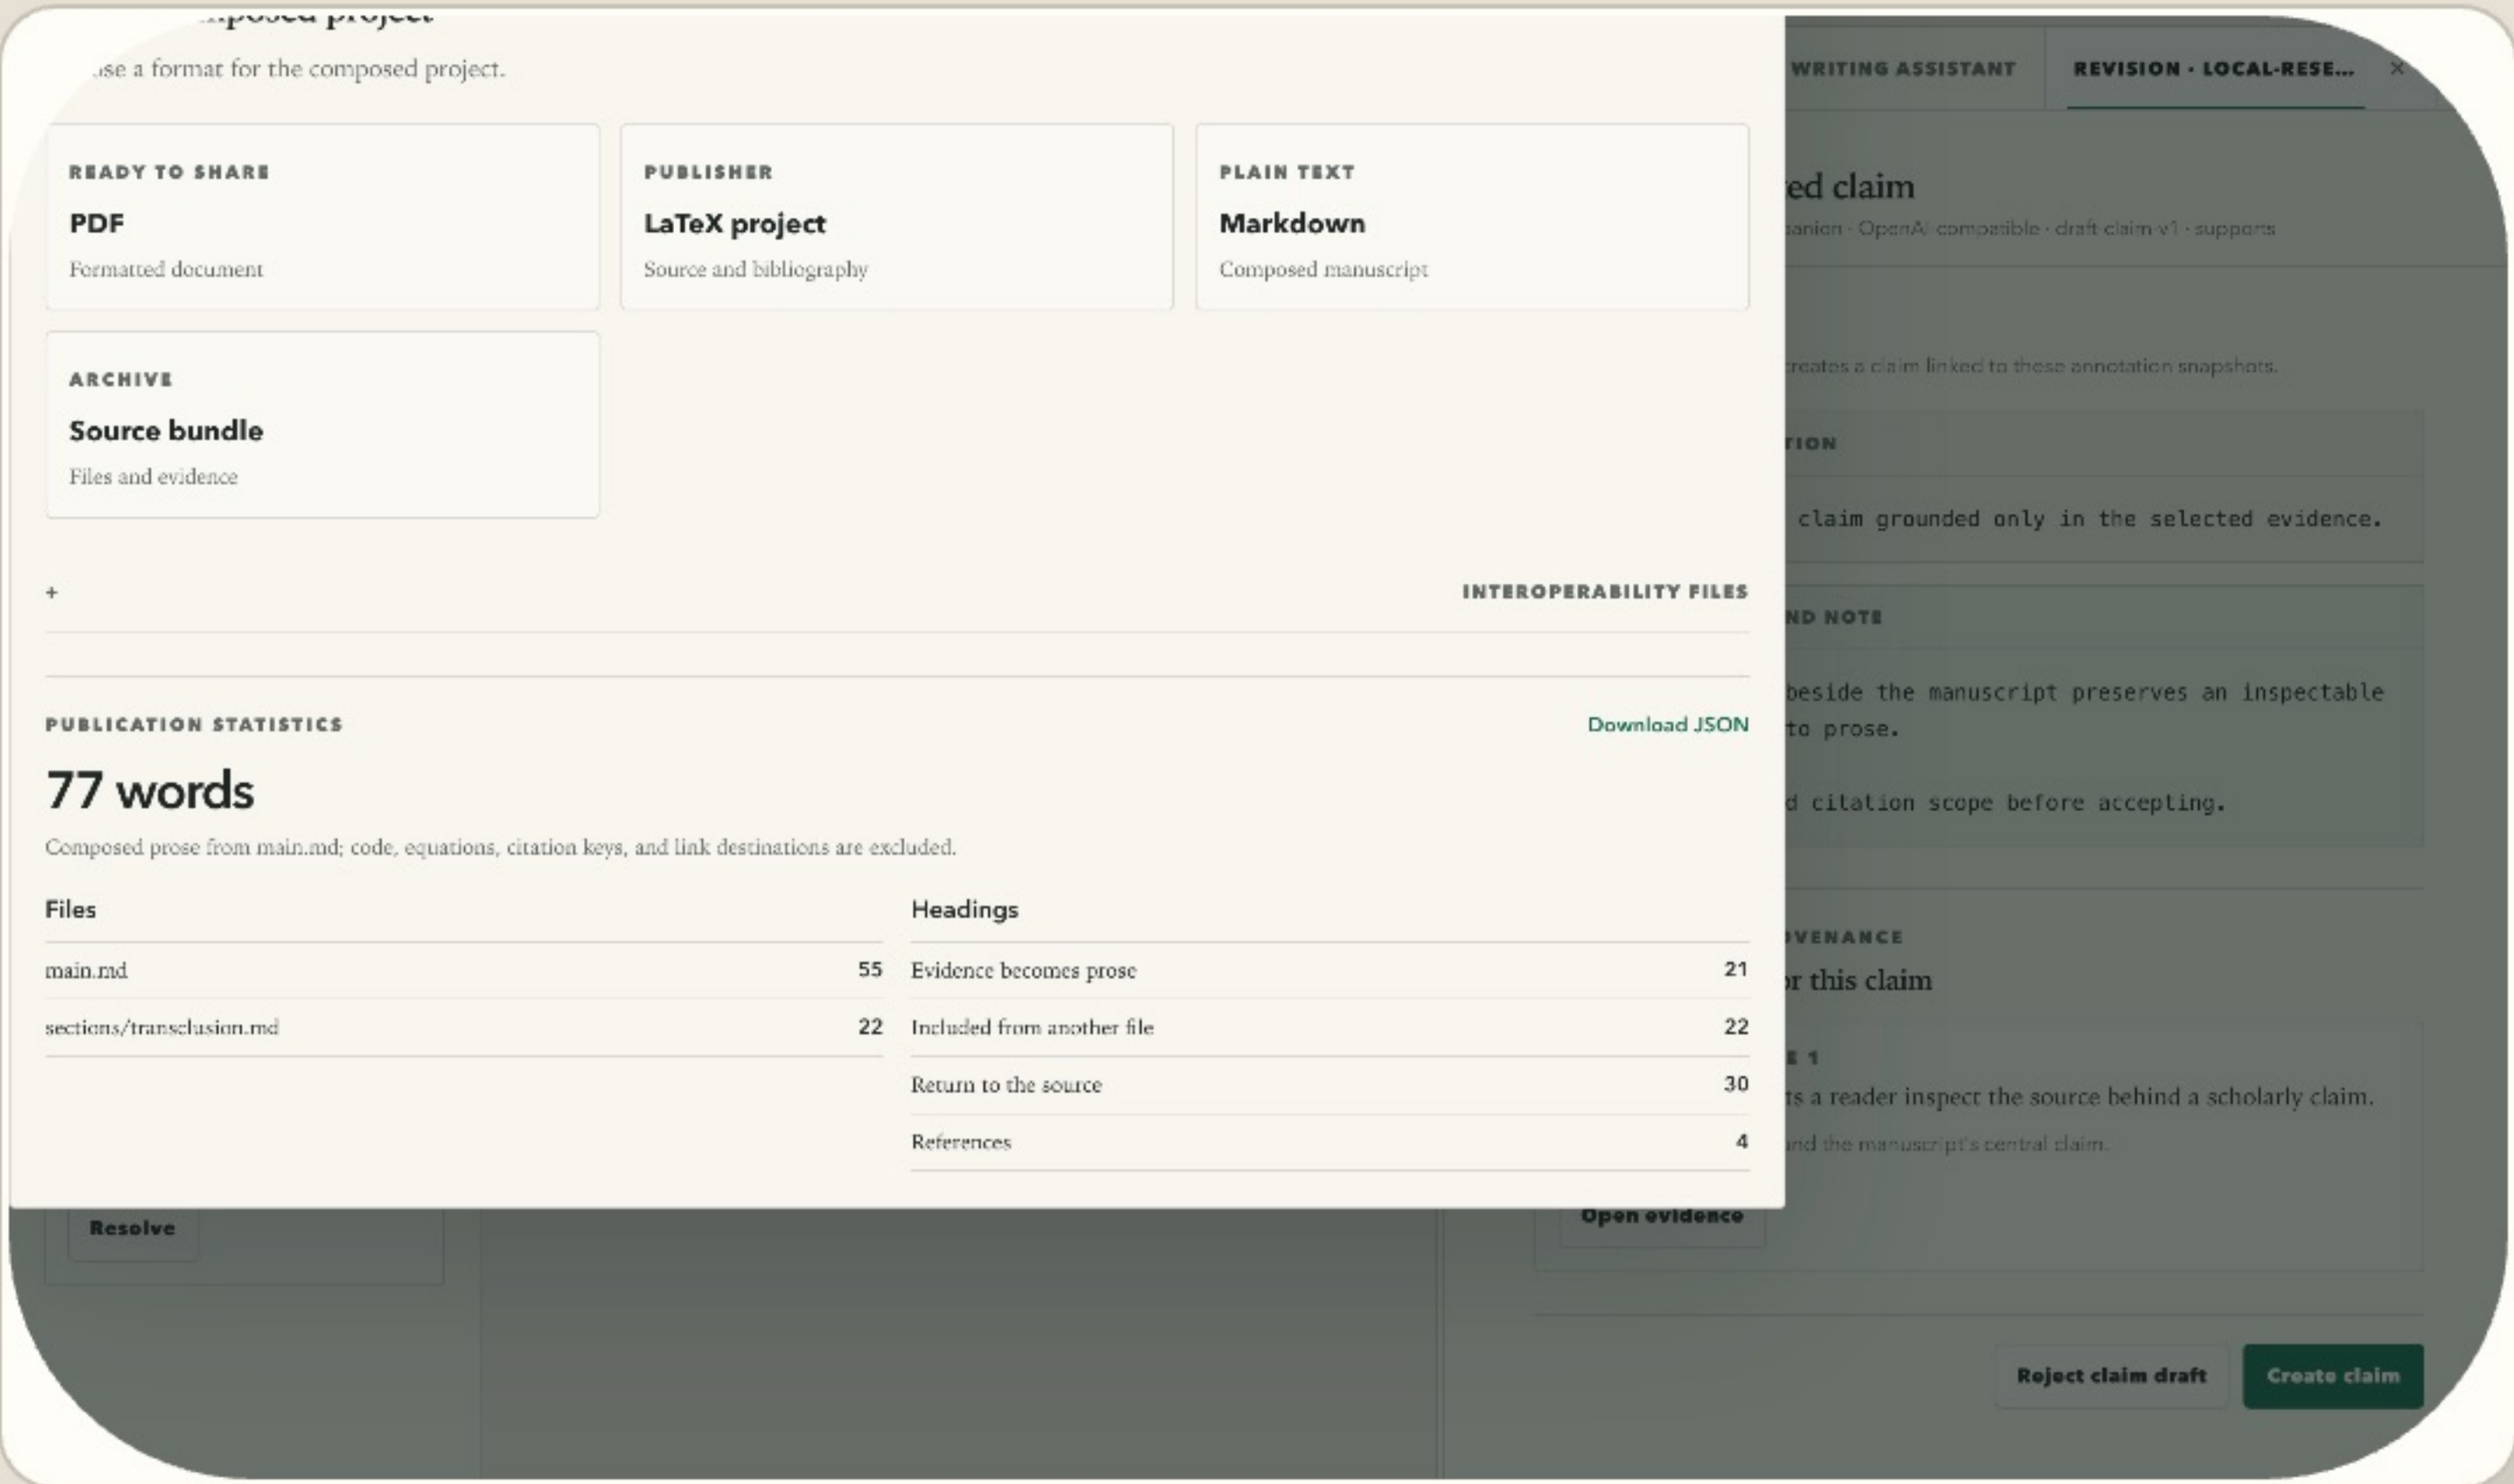

DURABLE BY DESIGN

The work remains yours.

Members can open linked PDFs. Public links cannot; raw bibliography stays behind interoperability.

SHARE · LINKS WITHOUT PRIVATE PDF ACCESS

EXPORT · PRIMARY OUTPUTS, BIBLIOGRAPHY ON DEMAND

Build Week integrated the product.

The entry shows the complete product while distinguishing pre-period foundations from the submission-period implementation.

FOUNDATION BEFORE JULY 13

Portable authoring and collaboration

- Markdown workspace and scientific preview
- Yjs collaboration and project recovery
- Reference library, PDF reader, and evidence links
- General local-model provider boundary

FINAL REVIEWED RANGE · JULY 13–19

One inspectable research-to-prose system

- Evidence map and independent reviews
- Highlight citation and PDF highlight import
- Member PDF access; never public links
- BibTeX only at interoperability boundaries

Codex accelerated the build. Human judgment set the boundaries.

QUALIFYING /feedback SESSION

019f6472-5ece-7cd3-b66f-ba344ba9e812

Codex inspected the live system, implemented scoped refinements, added tests, and repeated browser reviews through the final snapshot.

The author retained product direction, architecture, provenance rules, the human-disposition boundary, acceptance decisions, and final review.
