

Kirjolab

An integrated workspace where scholarly evidence becomes traceable prose.

INSPECT THE TRAIL · KEEP THE SOURCE · DECIDE WHAT CHANGES

A citation survives. Its evidence trail often does not.

Research work crosses tools. Each handoff makes the source passage, reasoning, model context, and human decision harder to reconstruct.

Reading and writing stay connected.

Portable Markdown, a live scientific preview, and exact PDF annotations remain directly navigable.

AUTHORING · CANONICAL MARKDOWN + LIVE PREVIEW

READING · PAGE GEOMETRY + PRIVATE NOTE

The evidence trail stays visible.

Source material

Evidence and reasoning

Manuscript

Typed links keep publications, PDF annotations, claims, model candidates, sections, and documents inspectable as one project structure.

The screenshot displays the Kirjab interface for a project titled "Evidence Becomes Prose". The interface is divided into several panels:

- Left Panel:** Contains a sidebar with sections like "Evidence reviews", "PROJECT EVIDENCE" (showing 2 KB of evidence and highlights), "CLAIMS" (with a "New claim" button), and "REFERENCES".
- Central Panel:** Titled "Evidence map", it shows a hierarchical project structure. The top level is "PROJECT Evidence Becomes Prose". Below it are three main categories: "SOURCE MATERIAL" (including a "PUBLICATION Traceable Evidence in Collaborative..." and a "PDF traceable-evidence.pdf"), "EVIDENCE & REASONING" (including an "ANNOTATION Use this passage to ground the manuscript's...", a "CLAIM Integrated evidence context makes scholarly...", and a "MODEL CANDIDATE Keeping evidence beside the manuscript..."), and "MANUSCRIPT" (including a "DOCUMENT Evidence Becomes Prose" and several "SECTION"s like "Evidence becomes prose", "Included from another file", "Return to the source", and "References").
- Right Panel:** Shows a preview of the manuscript. It includes a heading "1 Evidence becomes prose" followed by a paragraph: "Kirjab keeps the path from an annotation to a claim and into cited prose visible (merton1942, n.d.), p. 270." Below this is a heading "2 Included from another file" with a note: "This section lives in sections/transclusion.md. Edit that file from the Files rail and the composed preview will update here." Then a heading "3 Return to the source" with a note: "The preview resolves a link back to 1 Evidence becomes prose. Select this paragraph, attach a PDF annotation, and ask a local model to propose a grounded revision." Finally, a heading "4 References" with a note: "Missing citation: merton1942".

THE MODEL BOUNDARY

The screenshot displays the Kirjolaab web application interface, which is designed for managing research evidence and claims. The interface is divided into several sections:

- Top Navigation:** Includes tabs for SETTINGS, Dashboard, Library, Editor (active), Reviews, Evidence Becomes Prose, and Project. It also features a View Split dropdown, a user profile icon, and a 'Live · 1 writer' indicator.
- Left Sidebar:**
 - SEARCH:** A section for finding evidence, including a 'Sources & evidence' filter and a 'Evidence reviews' section with a link to 'Open the review catalog to link an R or MLR'.
 - PROJECT EVIDENCE:** A section with a '2' badge, showing a list of evidence items (e.g., 'aceable-evidence.pdf') and a 'Remove' button.
 - CLAIMS:** A section with a '1' badge, showing a 'New claim' button and a 'CLAIM · 1 SOURCE' section with integrated evidence context.
 - REFERENCES:** A section with a '1' badge, showing a 'Link selected prose' button.
- Main Editor:** A central area for writing and editing text. It includes a 'Write' button, a 'Map' button, and a '74 words' counter. The text is organized into sections with markers like `## Evidence becomes prose`, `::include`, `## Return to the source`, and `## References`.
- Right Panel:** A section for managing claims, including a 'PREVIEW' tab, a 'LIBRARY' tab, a 'WRITING ASSISTANT' tab, and a 'REVISION · LOCAL-RESE...' tab. It features a 'GROUNDED CLAIM DRAFT' section with a 'Draft evidence-backed claim' button, a 'RESEARCH INSTRUCTION' section, a 'PROPOSED CLAIM AND NOTE' section, and a 'GROUNDING AND PROVENANCE' section.

AI PROPOSES

The researcher decides.

- Explicit target and evidence
- Recorded model identity
- Reviewable candidate state
- Accept, edit, or reject
- No silent manuscript mutation

Local-capable. Provider-neutral.
Human-disposed.

DURABLE BY DESIGN

The work remains yours.

Scoped collaboration and rich runtime state end in ordinary, recoverable research artifacts.

COLLABORATE · SCOPED READ OR EDIT LINKS

EXPORT · PDF, LATEX, MARKDOWN, BIBTEX, SOURCE

Build Week integrated the product.

The entry shows the complete product while distinguishing pre-period foundations from the submission-period implementation.

FOUNDATION BEFORE JULY 13

Portable authoring and collaboration

- Markdown workspace and scientific preview
- Yjs collaboration and project recovery
- Reference library, PDF reader, and evidence links
- General local-model provider boundary

REVIEWED RANGE · JULY 13-19

One inspectable research-to-prose system

- Unified research context and evidence map
- Evidence-backed claims and typed model tasks
- Scoped sharing, imports, exports, and recovery
- Independent reviews plus browser audits

CORE PRODUCT RANGE e6a7bdf..99f51e5

798 UNIT | 116 WORKERS RUNTIME | 65 BROWSER TESTS

Codex accelerated the build. Human judgment set the boundaries.

GPT-5.6 VIA CODEX

gpt-5.6-sol

QUALIFYING /feedback SESSION

019f6472-5ece-7cd3-b66f-ba344ba9e812

Codex inspected the existing system, proposed focused changes, implemented features, added tests, and repeated browser-based UI reviews.

The author retained product direction, architecture, provenance rules, the human-disposition boundary, acceptance decisions, and final review.
